

SpeedCloud®
by NxtGen¹

SpeedCloud® **Performance Benchmark Brief**

speedcloud.nxtgen.com

SpeedCloud Outperforms Global Hyperscalers on Every Benchmark That Matters.

SpeedCloud® by NxtGen was benchmarked against Amazon Web Services (AWS), Google Cloud Platform (GCP), and Microsoft Azure on equivalent 8 vCPU/16 GB RAM/100GB instances. Tests covered compute performance (Geekbench 6), storage throughput (FIO), network performance (iPerf3), and database throughput (Sysbench).

SpeedCloud® delivered **Superior Performance** across all categories - *at lower cost.*

Complete Benchmark Result Summary

Test	Metric	AWS	GCP	Azure	SpeedCloud®	Best Gain
FIO	Seq. Read IOPS	93.3k	41.9k	52.3k	785k	+741% vs AWS
FIO	Seq. Write IOPS	92.7k	41.4k	10.8k	199k	+1,740% vs Azure
FIO	Random Read IOPS	16.7k	10.6k	3.6k	124k	+3,333% vs Azure
FIO	Random Write IOPS	16.7k	10.6k	3.6k	102k	+2,733% vs Azure
FIO	Rnd R/W IOPS	8.3k	5.2k	2.5k	83k	+3,220% vs Azure
Geekbench	Single-Core	1,047	1,431	1,653	1,875	+79% vs AWS
Geekbench	Multi-Core	5,642	5,656	3,504	9,781	+179% vs Azure
iPerf3	Sender Gbits/s	1.02	4.00	0.93	30.8	+3,210% vs Azure
iPerf3	Receiver Gbits/s	1.01	3.98	0.92	30.7	+3,239% vs Azure
Sysbench	Transfer MiB/s	536	4,837	3,980	4,662	+770% vs AWS
Sysbench	Max Latency ms	4.41	0.10	4.96	0.10	Equal to GCP

TEST METHODOLOGY

Instance: 8 vCPU/16 GB RAM/100GB equivalent instances across all four providers. Tests conducted January 2025.

Storage (FIO): 4K block size, sequential and random read/write operations measuring IOPS throughput.

Compute (Geekbench 6): Single-core and multi-core CPU performance scores. Higher scores indicate better performance.

Network (iPerf3): TCP transfer test measuring sender and receiver bitrate in Gbits/sec.

Database (Sysbench): File I/O test measuring data transfer rate (MiB/sec) and maximum latency (ms).

SpeedCloud®
Sovereign by Design. Engineered to Outperform.
