

The NxtGen[↑] Xperience

India's Sovereign Cloud & AI Powerhouse

At NxtGen, we don't just deliver cloud; we architect sovereignty, intelligence, and performance into every solution. Whether you're a government body navigating compliance, a bank modernizing core infrastructure / juggling audits, or a startup scaling AI models, NxtGen provides the platform, performance, and partnership you need to lead.

Real World Impact Stories: NxtGen in Action

From powering India's largest entertainment events to securing the nation's elections, NxtGen's cloud has consistently delivered scale, speed, and reliability for mission-critical workloads. These real-world deployments reflect our ability to serve high-stakes, high-volume Government and citizen-facing applications with unmatched performance and compliance.

BookMyShow

During high-traffic events like Bahubali and Avengers: Endgame, NxtGen handled over 6,50,000 requests per minute using elastic auto-scaling and high-performance storage. At peak, BMS catered to 2,50,000 concurrent users. This enabled over 1 million ticket sales in a day. Despite heavy-traffic, auto-scaling technologies helped handle the heavy load to ensure the system ran as smoothly as possible, not breaking even once. The sales were the highest ever, beating the record held by previous highest grossers.

भारत निर्वाचन आयोग
Election Commission of India

Election Commission of India

Enabled secure, real-time analytics for 4 national elections, processing 61.6 crore peak requests with zero downtime or incidents, fully compliant with CERT-In and MeitY guidelines. The system handled over 1,12,42,98,103 sessions during the seven phases of the General Elections 2024. The system successfully managed unprecedented scalability by using automation & prompt at every level.

Our Promise: Cloud That Works for India

India's digital transformation demands more than just infrastructure; it needs infrastructure with context. That's where we lead:

Hosted in India. Built for India. Compliant by Design.

Three pillars of Sovereignty across data, technology and operations.

MeitY Certified for Public, Private and Government Cloud

AI Infrastructure with Hardware Agnostic Architecture

Open, modular industry clouds tailored for BFSI, Government, and startups

NxtGen is the only cloud provider to offer SpeedCloud (Public), SpeedCloud Supreme (Virtual private cloud/On-Prem), and Government & Financial Services Cloud, all powered by Indian data centers and supported by Indian teams.

We do not chase complexity for the sake of innovation. Our philosophy is simplicity by design, delivering solutions that are powerful, predictable, and easy to adopt. We focus on getting the fundamentals right: data sovereignty, price-performance, compliance, and operational transparency.

Unlike black-box public clouds, NxtGen gives customers full control:

OpenStack access for hypervisor-level visibility

Full telemetry, logs, and right to audit across deployments

Built for modular growth — public, private, and hybrid-ready

What Sets NxtGen Apart

Differentiator	What It Means
Sovereign Cloud	100% India-hosted infrastructure, compliant with DPDP, RBI, SEBI, and MeitY.
Cost & Performance Edge	Delivering superior performance at lower cost with no compromise on quality.
AI Infrastructure	NVIDIA H100NVL, H200SXM, B200SXM, L40S, AMD MI325X, Intel Gaudi 2, Hardware Agnostic Architecture using Red Hat, that allows model hosting at scale. SAS-F patented framework to guide AI outcome build.
Industry-Specific Clouds	Financial Services Cloud, Government Cloud, built for regulatory alignment. Adding more verticals to focus on domain specific needs.
SpeedCloud Portfolio	From OpenStack-based public cloud to OpenShift-based private, built for choice.
Customer Lifecycle Team	Post-sales isn't an afterthought. It's your secret weapon for adoption, optimization,

Why NxtGen, Why Now

India's cloud and AI future cannot rely on imported infrastructure or foreign jurisdictions. It must be architected on platforms that are built in India, operated by Indian professionals, and governed by Indian laws. That's the NxtGen way.

We are more than just a cloud provider—we are a strategic partner to India's digital transformation. With deep investments in sovereign cloud infrastructure, AI-ready GPU compute, and compliance-first design, NxtGen ensures that mission-critical workloads stay secure, performant, and future-proof.

Trusted by over
1,000+ enterprises

Supporting critical
workloads in BFSI,
Government,
healthcare, and
startups

Committed to
sovereignty,
transparency, and
innovation

In choosing NxtGen, you are not just selecting a vendor but embracing a partner that will help build a sovereign, secure, and intelligent digital foundation for India's digital destiny.

Deep Dive Into Our Differentiators

Sovereign Cloud – India First, Compliant Always

Feature	Why It Matters
Securing Data	Secure data using encryption at rest, in transit & while processing in memory with master encryption and secrets for secure access; giving customers control and access to data & encryption keys.
Control Data Access	Through identity & access management tools & audits.
Data Residency	Your data stays within India, meeting DPDP, RBI and MeitY guidelines.
CLOUD Act Immunity	Built outside U.S. jurisdiction, data is safe from FISA 702 and CLOUD Act reach.
Indian Operations	Fully staffed and operated by Indian citizens, aligned to Digital India and self-reliance.
Technological Sovereignty	Defines the degree to which our customers are assured of technological independence. Enables ephemeral, disconnected mode for the solution to work isolated. We have deployments at customer on-premise to give complete comfort to our customers.
Infrastructure Autonomy	Management & monitoring tools, logs, deployment, administrative, access, control and change are fully with NxtGen.

Security Built for Mission-Critical Workloads

Feature	Why It Matters
Defense-in-Depth	Enterprise-grade security across perimeter, workload, and data.
AI-Driven Threat Intel	Rapid detection, zero-day mitigation, and predictive threat modeling.
Audit & Compliance Ready	ISO 9001, ISO 20000, ISO 27001, MeitY, PCI-DSS, HIPAA, ideal for regulated industries like BFSI, healthcare, Govt. SOC, CSA Star

Cloud on Your Terms: Modular, Open, Controllable

Feature	Why It Matters
Public or Private? You Choose	SpeedCloud (OpenStack) or SpeedCloud Supreme (OpenShift), your infrastructure, your control.
Customization & Visibility	Fine-grained configuration and full data path transparency.
No Vendor Lock-In	Open standards, API-driven, and built for hybrid environments.

Engineered For AI, End to End

Feature	Why It Matters
Hardware Agnostic Architecture	Your Choice. Our Expertise. You get a chance to choose what kind of GPU you require and we deliver it from a platform powered by Red Hat's Hypervisor
Model Hosting & Inference	Built to serve enterprise-grade LLMs, VLMs, Video Analytics, computer vision use cases to name a few
AI PaaS Products	Compatible with 100+ OEM-specific platform services from market leaders like NVIDIA, AMD & Intel
SAS-F enabled (Patent Pending)	SAS-F encompassing 5 phases is a bespoke way of delivering tailored AI Usecases to our customers right from Solution Engineering till Deployment & Continuous Improvement

High-Performance Infrastructure That Scales with you

Feature	Why It Matters
Optimized for AI	Supports GenAI solutions, LLM training, and inference on-demand.
Elastic Resources	Real-time scaling for compute, storage, and GPU with no service disruption.
Always-On	99.5% uptime, DR options, and geo-redundancy for business continuity.

Customer Lifecycle Managers (CLM) Team - Your Growth Partner

Unlike hyperscalers, we don't stop at sign-up. Our Customer Lifecycle Team ensures every deployment is adopted, optimized, and expanded.

Benefits of the CLM Team

Our CLM team provides numerous benefits to our customers, including:

Improved Adoption

Our CLM team helps ensure our customers get the most out of our solutions, which leads to improved adoption and ROI.

Increased Customer Satisfaction

Our CLM team's proactive approach ensures that our customers are happy with our solutions and get the support they need.

Reduced Churn

By providing ongoing support and optimisation, we reduce the risk of our customers churning and increase customer loyalty.

How the CLM Team Works

Our CLM team works closely with our customers to understand their needs and provide tailored support. Here's how it works:

Regular Check-Ins

To ensure you get the most out of our solutions.

Proactive Support

Identifies and resolves issues before they become major problems.

Customized Solutions

CLM helps you to develop tailored solutions that meet your unique needs.

By providing a dedicated CL team, we demonstrate our commitment to our customers' success and help them achieve their goals

Result: Better ROI. Faster success. Lower churn. Higher lifetime value.

Verified Performance Benchmarks

NxtGen's SpeedCloud platform delivers superior performance at a lower price point, leveraging industry-standard benchmark tools to ensure optimal CPU, storage, memory, and bandwidth performance. With features like RDMA, encryption, and NVMe drives, SpeedCloud provides consistent computing excellence. Our open-source technologies and innovative hardware designs reduce capital expenditures, operational expenses, and energy consumption, resulting in 50% lower TCO as compared to other global cloud providers, all backed by a 100% uptime.

Metric	AWS	GCP	Azure	SpeedCloud
CPU Performance				
Single-core Score	1.04k	1.43k	1.65k	1.87k
Multi-core Score	5.64k	5.65k	3.5k	9.7k
Storage Performance				
Read	93.3k	41.9k	52.3k	785k
Write	92.7k	41.4k	10.8k	199k
Random Read	16.7k	10.6k	3.6k	124k
Random Write	16.7k	10.6k	3.6k	102k
Random Read Write	8.3k	5.2k	2.5k	83k
Memory Performance				
Data Transferred (MiB)	5.36k	48.3k	39.8k	46.6k
Transfer Rate (MiB/sec)	536.21k	4.8k	3.98k	4.66k
Latency max (ms)	4.41k	0.1	4.96	0.1
Bandwidth Performance				
Transfer (Sender, GBytes)	1.19	4.66	1.08	35.9
Bitrate (Sender Gbits/s)	1.02	4	0.93	30.8
Transfer (Receiver, GBytes)	1.18	4.65	1.07	35.9
Bitrate (Receiver Gbits/s)	1.01	3.98	0.92	30.7

Benchmarks based on industry-standard tools like Geek bench, FIO, and iPERF3.

About NxtGen :

NxtGen is India's largest sovereign cloud and AI provider, serving 1000+ customers across the country. NxtGen operates SpeedCloud® - public cloud platform, SpeedCloud Supreme – an alternative to private cloud, and Industry vertical clouds for the Government and Financial Services. NxtGen delivers value to its customers by ensuring superior performance at lower cost. NxtGen AI portfolio unifies GPU platforms from NVIDIA, AMD & Intel and provides a wide choice of highly optimized models to build enterprise use cases. NxtGen is working to truly democratize the cloud and AI technologies, by making them viable for enterprises of all sizes.
